

Overview

The following is a list of specific objectives you will meet before completing this activity:

- 1-1 Define forestry.
- 1-2 Discover the two major types of forests.
- 1-3 Define and explore forest management.
- 1-4 List the public benefits of the forest.
- 1-5 Explore the importance of forestry around the world.

STEP 1

Introduction

Welcome to the Forestry Module. This Student Guide is divided into two sections. The first section consists of several activities that will introduce you to the basics of forestry. You will use the information gained in the first section along with additional material from the second section to solve several challenges. Begin your study of the Forestry Module by reading each step in the daily activities and completing the assignments.

STEP 2

Inventory

While working in this module, it will be your responsibility to maintain all components of the module.

If necessary, turn on the computer and wait for it to go through its "boot up" procedure. When the *Media Cruiser* interface is displayed, log in, and click **Lessons, Activity 1**, then **Inventory**. Once you've located the various items on the list, click Yes.

- 1 - Applied Technologies Forestry Module Student Guide
- 2 - *Forests and Forestry* text
- 1 - Wood identification block set
- 1 - BioQuest Tree Growth Study kit

If you are unable to find an item, click No. Report any problems, such as missing or damaged items, to the instructor. You will also be required to document the items in the Inventory Journal that will appear after you click No. When you are finished, click Score It.
