

## STEP 6

### Checkpoint

Signal the instructor to verify that you have successfully completed your work.

The instructor should click **Lessons, Activity 2**, then **Checkpoint 1**. Once the instructor has completed the short evaluation of your work, go on to the next step.

## STEP 7

### Critical thinking

Click **Lessons, Activity 2**, then **Journal**. Click File, select Open, then locate and double-click your journal file.

Leave a couple of blank lines after the last entry.

Pick a product and, in your journal, describe how you think it came about, according to the design loop process. For instance, what was the initial problem the product was meant to address? What alternative solutions might have been considered? Think about every step of the design loop in relation to the product.

When you've finished the entry, open the File menu, click Save, and then exit the program.

## STEP 8

### Reorganize

It is time to clean up. Remember, you are responsible for the workstation, so be sure to leave it neat.
