

Overview

In this activity you will meet the following objective:

- 8-1. Continue developing the logo that will be embroidered in **Activity 10**.

STEP 1

Inventory

As you've done previously, click **Lessons, Activity 8**, then **Inventory**, and complete the inventory procedures.

STEP 2

Do this

You should be working diligently on your logo, keeping in mind the parameters on page 41 and the layout and design principles you've learned over the course of this module.

Continue working until there are 5-10 minutes left in the class period, then go on to the next step.

STEP 3

Summarize

Click **Lessons, Activity 8**, then **Journal**. Click File, select Open, and then locate and double-click your journal file.

Leave a couple of blank lines after the last entry.

In your journal, discuss whether you have looked at embroidered materials a little differently since starting this module? Have you paid attention to stitch directions, outline widths, and different kinds of stitch patterns? In your journal, describe these observations.

When you've finished the entry, open the File menu, click Save, and then exit the program.
